FULL STACK DEVELOPER | 5+ YEARS OF EXPERIENCE

Full stack developer with a strong focus on clean code, modern frameworks, and business-driven results. Skilled at building secure, scalable, and user-focused systems – from architecture to deployment – with proven success improving system performance, user experience, and operational efficiency.

PROFESSIONAL EXPERIENCE

Surge Mobile Access Inc. - Pasig City | Oct 2025 – Present

Full Stack Developer

- Developed a MERN-based React Native live streaming app integrated with LiveKit and DeepAR, with real-time socket features for sending gifts and buying coins.
- Developed a MERN stack-based wallet and payment gateway integrated with QRPH and cryptocurrency wallet providers.
- Designed and implemented a WiFi captive portal system that redirects connected users to a web platform for internet voucher purchase and activation, integrating a payment gateway and Omada API for automated user authentication and network access control.
- Applied MultiChain for Distributed Ledger Technology (DLT) implementation in the wallet project.

Vértere Global Solutions, Inc. - Makati City | Feb 2025 – Sept 2025

Full Stack Software Developer / Programmer Analyst III

- Developed self-service loan application portal (Vue, Tailwind, Codeigniter API), delivering 50% of MVP features.
- Built a Banker's Rule (360-day interest) API microservice for multi-system integration and reuse.
- Implemented automated document generation (PN, DS, amortization), significantly reducing manual processing for thousands of documents by 100%.
- Drove microservice adoption across 4 channels in collaboration with leads and analysts.

Freelance | Sept 2024 – Jan 2025

Full Stack Developer

- Built a scalable casino platform covering both admin and player operations with APIs/Seamless Wallet integration (Evo, Jili, SA Gaming, PG Soft).
- Implemented secure payment processing for Casino platform to handle deposits and withdrawals efficiently.
- Developed and integrated third-party payment APIs (DragonPay, FuturePay, Sunny Page) to enable seamless functionality across multiple platforms.

MDS Call Solutions Inc. - Makati City | Aug 2023 – Aug 2024

Full Stack Developer

- Developed self-service Early wage application (Vue, Tailwind, Laravel API), delivering 100% of MVP features.
- Developed and maintained REST APIs, ensuring secure, high-performance cross-system communication.
- Integrated UnionBank's i2i Open Finance platform to support seamless, compliant multi-institution fund transfers.

Lucky8star Quest Inc. - Mandaluyong | Oct 2020 – Jul 2023

Full Stack Developer

- Engineered scalable front-end and back-end architectures, optimized database structures, and configured WebSockets for real-time updates.
- Designed intuitive user flows and collaborated with designers to deliver cross-platform, visually appealing user experiences.
- Improved application performance and stability, contributing to higher user retention and smoother platform operations.
